About This Game

Looking out on Pleasantville one afternoon, Lord Cthulhu realized he was very lonely. He decides to send a single Tentacute to go make new friends with these "Bonies." After enough friends have been made, the portal to R'lyeh opens & each friend will be sacrificed. In a style that is a cross between "Hotline Miami" and "Pikmin", convert your friends into fellow cute cephalopods!

The problem? All of your newly converted friends are frickin' morons that mimic your every move! Luckily with strategic planning you can manipulate them against the environment to get back to the portal home to keep Lord Cthulhu company.

It's good but the comics are a little short..

. Within 15 minutes I was already battling Satan himself. Do I need to say more?. I haven't finished it yet but I'm loving the retro style and writing. Many 'Easter Egg' references to other real life films (freddy kruger, friday the 13th, breakfast club, dirty dancing) are the only ones ive found so far. I also like the selective voice acting, running around a corner and stepping on a branch and hearing "C'MERE KID" or "I SEE YOU NOW." and you're being rushed by a bear mascot and a knife can give you a spook. Ceress and Orea is a wonderful little game that deserves alot more attention than it receives.

Ceress and Orea's most striking feature is perhaps the visuals of the game. The game aims for a retro 16-bit appearance, but at the same time it adds a distinct, vector-like appearance to it. The graphics are very similar to Rakuen, they're very bright and vibrant when the game needs them, and morose and dull when the game needs to project an atmosphere of dread. And I think that atmosphere is something that the game hinges on for it's success, it plays on the emotions of the player - hope, sadness, fear, relief - and I think that is the reason why I found the visuals so appealing.

The soundtrack is also phenomenal. It is every bit as atmospheric as the graphics, and it really helps to tie the emotions of the player into the story. I don't really have anything else to say, I really wasn't expecting this game to have a soundtrack as good as it has. It is definitely good enough to warrant a commercial release.

I'll admit, the puzzles that the game gives you aren't particularly challenging, although I don't think that harder challenges would fit the game. The game is alot more 'soothing' than most RPGs, there's no combat system, all you really do is explore the gameworld completing small puzzles and chipping away at the story. This is a theme that runs concurrent to other RPGs like To The Moon, Rakuen, etc; there is no real challenge as frustration would ruin the relaxing way that the game tells the story. I could see why other people might not like this style of gameplay though.

Unfortunately given the current political climate, whenever I see a piece of media that advertises that the game stars an LGBT main character, I get a bit skeptical - that isn't to say that we shouldn't have LGBT characters in games, it's just that alot of games try to make that their selling point for an otherwise mediocre experience, then decry critics using accusations of 'bigotry' as ammunition. Equally, it means that genuinely good games are marred by this, and people brush over them, or, play them and have a pre-decided vitriole for them. It's a real shame honestly. However, I think that this game should be a model for those: The game didn't feel overt or forced in terms of how it portrayed the sexuality of its characters; it just felt normal, and I found that quite refreshing. My thoughts are also the same for the inclusion of a female protagonist.

My only real complaint is that the game is too short, I wanted to keep on playing! I also thought that the ending sequences of the game were a bit lacking, but honestly the game exceeded my expectations greatly.. No more Updates GG game.. Hardware: Windows 10 with nVidia GTX 1070. Stable, no issues.

Bought it because: I like "Choose your own Adventure" style games.

Starts in Russian; you can change to English in the lower left of the main screen. I also suggest muting the game, as it has rather loud, obnoxious rock music that doesn't lend itself to a medieval theme.

I have to give this one a thumbs-down. The illustrations are nice, but the writing is weak and anachronistic, a fatal flaw in a "Choose your own Adventure" game. I quit when I got to the Blacksmith, and he told me he's run out of uranium and therefore can't build the "gazillions of warheads" he's been commissioned to make. That sort of thematic inconsistency (medieval + nuclear weapons) and modern jargon ("gazillions") makes it impossible for me to enjoy the story.

There's no reason for it to be done this way. You could take the same illustrations and make a Choose your own Adventure worthy of a Game of Thrones episode.

I suggest a professional rewrite, by a native English speaker.. I've seen porn parodies better than this.. If you screw up towards the end there is no spawn point.. king of blows for this reason.. honestly I don't care about any one but PBG but just giving me the option is a perfect 12/10
